

## **Stig Valter Karlsson**

Founding Board member  
Sustainable Sweden Association

Teacher, independent consultant and China expert.  
Project leader - Energytower AB - future wind power technology.  
Since 1978 he has several times annually visited China with group tours for Swedish companies and organizations to China. Speaks Chinese and has a vast network in the interface of Sweden and China.  
Since the 90-ies, Special Advisor to the Nordic Timber Council. Assists Swedish municipalities and prefectural authorities in contacts with China in the areas of business, culture and social issues. Comes from the prefecture of Västerbotten where forest industry is big business at the same time as there is plenty of nature to enjoy. As an observer of China's rapid development Stig Valter Karlsson is strongly committed to promoting sustainability worldwide.

## **Sustainable Sweden Association**

Sustainable Sweden Association is a nonprofit and non-governmental organization founded in 2000. Its aim is to be a driving force in sustainable development (ecological, economical and socio-cultural) worldwide. We welcome organizations to join, participate and start projects together with us. We develop projects in order to find out how collaboration between business, government, science, agriculture, education, environmental organizations and municipalities can result in healthier communities and successful business.

The members of the Sustainable Sweden Association have knowledge and experience gained from working with sustainable development for over 20 years. This provides a platform for exchange of experiences with the rest of the world. Everything in the name of our overall goal - a sustainable earth.
